Office of Governor Jay Inslee
IDMProjected Infection Rate for King Co.

- Expectation with $R_e$ increasing gradually over time (starting May 1, 2020)
- Expectation with $R_e$ decreasing gradually over time (starting May 1, 2020)
- Expectation with $R_e$ maintained at levels based on mobility data

- WA DoH daily positive COVID-19 tests in King County used for model fitting
- WA DoH daily positive COVID-19 tests in King County (4/26 update)
Cautious, well-informed relaxation will be critical
Reopening Washington

A Phased Approach to Recovery

The Data - Measuring the Risk in Easing Physical Distancing Measures

COVID-19 Disease Activity
Low and falling disease burden as measured by:
- COVID-19 cases, hospitalizations and deaths in WA
- Rates of COVID-19 spread throughout WA (aka R_t or “R nought”)
- Modeling data from IDM, IHME and Youyang Gu
- Physical distancing adherence trends in Washington State

Testing Capacity and Availability
Ability for everyone with COVID-19 symptoms and those with high-risk exposures to be tested immediately as measured by:
- Number of tests performed per day
- Testing capacity, including supply chain and speed

Case and Contact Investigations
Ability to rapidly isolate those with COVID-19, and identify and quarantine their contacts as measured by:
- Number of investigators trained and working
- Availability of isolation and quarantine facilities in active jurisdictions
- Percent of cases investigated within 24 hours of receipt of positive test report
- Percent of contacts reached within 48 hours of receipt of report

Risk to Vulnerable Populations
As measured by:
- Number of outbreaks in long-term care facilities per week
- Demographic and equity data

Health Care System Readiness
As measured by:
- Hospital beds
- ICU capacity
- Ventilator numbers
- State PPE procurement
